Education & Awards

Academic Qualifications

- **Pennsylvania State University** **Ph.D.**
Information Sciences and Technology, GPA: 3.91/4.00 2020.08–2024
- **Sichuan University** **Bachelor**
Computer Science, GPA: 3.86/4.00, Major GPA: 3.924/4.00 2020.06

Honors & Awards

- **The Award of Excellence, MSRA Internship Program** 2020
- **National Scholarship** (THREE TIMES) 2015-2018
- **The First Prize Scholarship of Sichuan University** (THREE TIMES) 2015-2018
- **The First Prize in Sichuan Province Lanqiao Programming Contest** 2017
- **The First Prize in Sichuan University Mathematics Competition** 2016

Skills

- Experience in processing different kinds of data (Image, Text, Web Data, Audio).
- Experience in all kinds of deep learning frameworks, including Transformers, LLMs, diffusion models, GAN, graph neural networks, information retrieval frameworks, and object detection frameworks.
- Experience in Natural Language Processing and Computer Vision related topics.
- Experience in building web pages and mobile applications for machine learning models.
- Master in Python (PyTorch, TensorFlow, Keras) and familiar with C#, C++, Java, and JavaScript.

Research and Work Experience

- **Research Assistant on Machine Learning for Healthcare** **Dr. Fenglong Ma**
Pennstate University IST, Pennsylvanian, USA Feb 2020–Now
 - **Multi-modality Pre-training of EHR Data**
Summary: *Developing a novel, multi-modal, and unified pretraining framework called MEDHMP for multi-modality health data pre-training.*
Used Skills: Python, Multi-modality, Machine Learning, Spark
 - **Automatic ICD Coding based on Diagnosis Text**
Summary: *Using information compression to reduce the clinical note noise and improve the speed of automatic ICD coding.*
Used Skills: Transformers, NLP, ICD Coding
Summary: *Improving ICD coding performance through modeling contextualized code relations through graph network.*
Used Skills: Python, NLP, Machine Learning, Graph Network
 - **Medical Text Simplification**
Summary: *Designing a controllable medical term simplification pipeline for using external medical dictionary knowledge.*
Used Skills: Python, Neural Network Pipeline, NLP, Question Answering
 - **Electric Health Record Mining**
Summary: *Using two-level transformers to model the complex EHR code sequential data to predict future diseases.*
Used Skills: Python, Transformers, Disease Prediction
- **Research Intern on Natural Language Processing** **Dr. Danica Xiao**
Relativity, USA June 2023–Aug 2023
 - **Designing Algorithm for Preventing Hallucination for Large Language Models (LLMs).**
Summary: *Using prompt engineering to perform self-evaluation under the zero-resource setting to test the understanding of LLMs to the instructions.*
Used Skills: Python, NLP, Large Language Models, Prompt Engineering

- **Research Intern on Machine Learning for Clinical Data** **Dr. Cheng Qian**
May 2022–Dec 2022
 IQVIA, USA
 - **Designing Clinical Trial Retrieval Algorithm Based on Trial Protocols.**
 Summary: *Designing hierarchical matching model for trial protocols with novel group-based training loss and 2D word matching.*
Used Skills: Python, Machine Learning, NLP, Transformers, Information Retrieval
 - **Designing Personalized Drug Risk Prediction Model.**
 Summary: *Incorporating the patient's EHR modality with the drug molecular level information to predict the potential adverse reaction.*
Used Skills: Python, Spark, Machine Learning
- **Research Intern on Knowledge Computing** **Dr. Jinpeng Wang**
Mar 2019–Jan 2020
 Microsoft Research Lab - Asia (MSRA), Beijing, China
 - **Automatic Pattern Recognition from Power Point Design.**
 Summary: *Transforming the pattern matching into a sequential matching problem to discover potential design patterns.*
Used Skills: C#, Sequential Matching
 - **Object Detection for Special Chart Images.**
 Summary: *Designing a high precision point-based object detection model for chart objects with web-based API.*
Used Skills: Python, C#, Django, Web , Computer Vision, Object Detection
- **Research Intern on Natural Language Processing** **Dr. Min Yang**
Sep 2017–Jul 2018
 Shenzhen Institutes of Advanced Technology(SIAT), Shenzhen, China
 - **Developing methods to generate semantic embedding for long sentences and cross-modal searching**
 Summary: *Using back-encoding to ensure the cross-modality relation between learned text and image embeddings.*
Used Skills: Python, Machine Learning, Information Retrieval
